Disease Prediction System Report

Date: 2026-10-20 20:24

Patient Information

Name:	Alex Mercer	**Age:**	42
Gender:	Male	**Date:**	2026-10-20

Clinical Medical Report & Observations

Report Type: Cardiology & ECG Report

Attached File: f0101157_alex_mercer_ecg_report.pdf

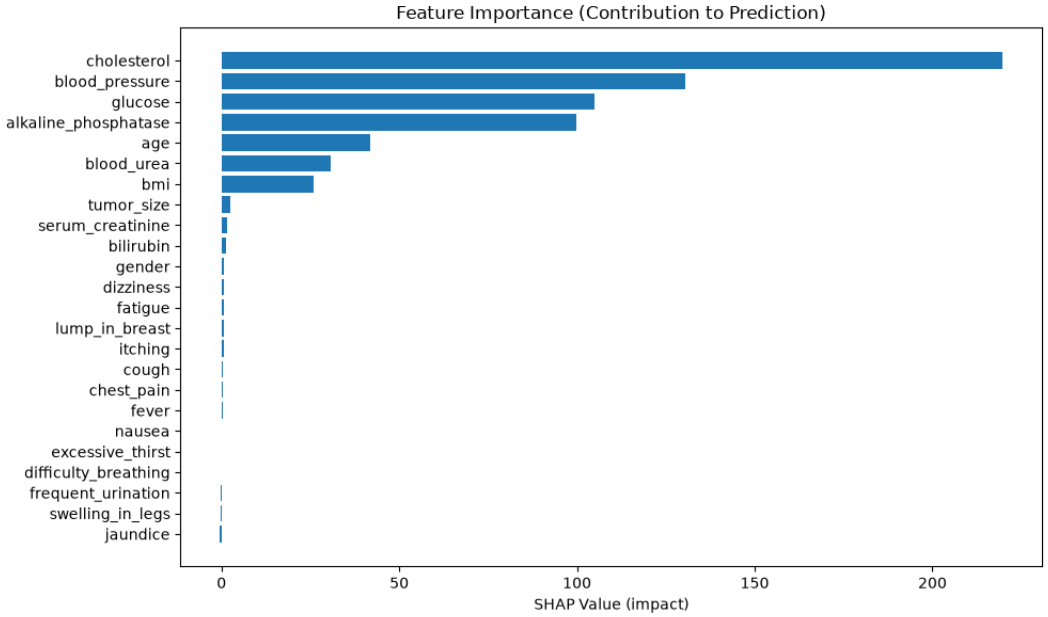
ECG showed normal sinus rhythm. Slight ST flattening noted.

Prediction Results

Disease	Probability
Breast Cancer	40.66%
Respiratory Infection	24.9%
Metabolic Syndrome	13.44%

Feature Importance Analysis

The chart below shows which factors contributed most to the prediction.



Feature Importance (Contribution to Prediction)
cholesterol
blood_pressure
glucose
alkaline_phosphatase
age
blood_urea
bmi
tumor_size
serum_creatinine
bilirubin
gender
dizziness
fatigue
lump_in_breast
itching
cough
chest_pain
fever
nausea
excessive_thirst
difficulty_breathing
frequent_urination
swelling_in_legs
jaundice
